

# Accurate and secure clocking in and out

Fingerprint Scanning  
For Indoor Workplaces

# Optical fingerprint sensor time clock

The Xenio 200® quickly and securely captures high-contrast, low-distortion fingerprint images.

  
**Flexible Subscription**  
Benefit from the latest technology without the upfront costs.

  
**Solid Guarantees**  
Unlimited and limited warranties for subscription and purchase options

  
**Employee Privacy**  
Secure data encryption and seamless, real-time data transfer

## Fast Optical Fingerprint Scanning – A Lot More

 **Smooth, easy self-enrollment**

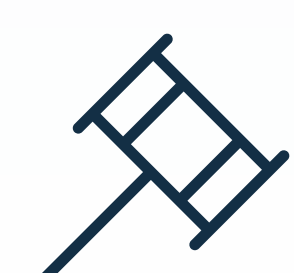

Enrollment is fast and secure with a selfie, speeding enrollment and improving employee satisfaction.

 **Great employee experience**

Employees can review the hours worked in a pay period and previous punches, right from the time clock.

 **Valid clocking, consistently**

Easily set punch restrictions; prevent clocking outside of scheduled shifts or when overtime is reached.

 **Compliance with break rules**

Let employees select, waive, or attest to a break directly from the time clock; ensure minimum break times are taken.

 **More accurate job costing**

Require employees at clock-in to choose a project, client, or job — or set automatic default selections.

 **Remote device configuration**

Apply settings for all devices or selected ones directly from the software or define employee permissions.

# Fast verification, encrypted templates

Easily and accurately authenticate fingerprints; secured, encrypted employee fingerprint templates ensure privacy.

## OS & Memory

Android  
Up to 10,000 Fingerprints

## Display

4.3" Touch LCD

## Languages

English & Spanish

## Cloud Connection

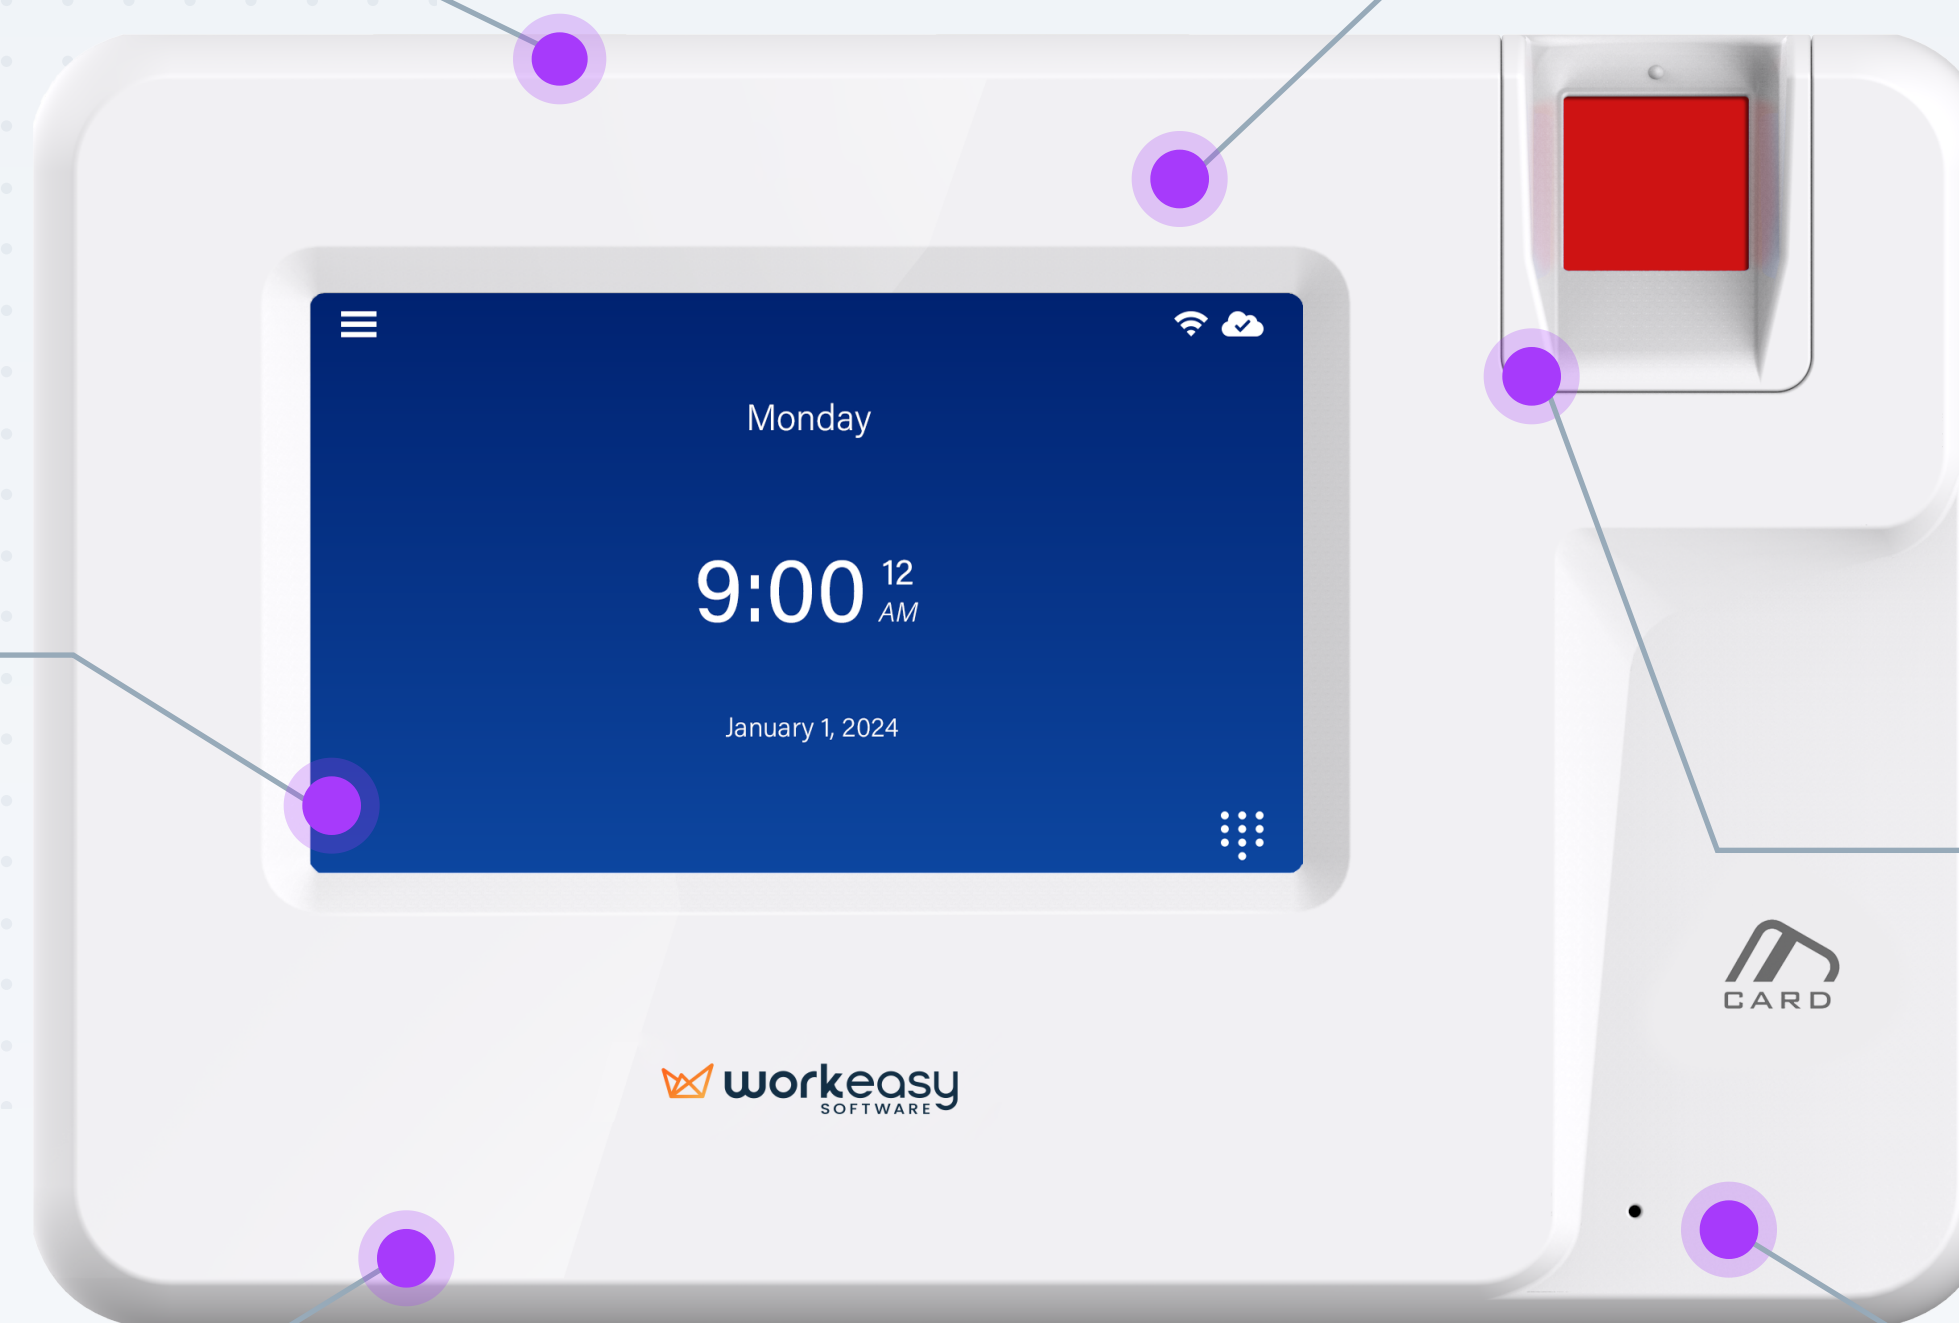

Ethernet & WiFi

## Biometric Scanner

500 DPI  
15.24mm x 20.32mm

## Card Reader

125 kHz RFID  
HID Prox, iClass SE, MIFARE (Optional)

## Specifications

### Biometric Scanner

Image Resolution: 500 DPI/8-bit  
Scanning Area: 15.24mm x 20.32mm  
Matching: 1:N up to 10,000 fingerprints

### Smart Card Reader

Frequencies: 125 kHz RFID  
(13.56 MHz RFID Optional)

### Protection & Certifications

CE, FCC, & ROHS

### Dimensions

Height: 5 inch  
Width: 7.5 inch  
Deep: 1.63 inch

### Power

12V/2A  
PoE + IEEE 802.3at

### OS & Processor

Android  
TI ARM A8 Cortex 1 GHz

### Memory

4GB Flash Memory  
512 RAM

### Display

4.3" Touch Screen  
Color LCD

### Connectivity

WiFi  
Ethernet  
Universal Relay: 3A

### Bracket

Wall Mount

## FAQs

### What should I consider before using any fingerprint time clock?

Consider the risks and benefits of the technology, the privacy policy of the vendor, and the laws and regulations in your jurisdiction.

### How are an employee's fingerprints and privacy protected?

Encrypting the image data, limiting access, performing regular system-vulnerability audits, and other measures protect the information our biometric time clocks gather.

### How do fingerprint scanning time clocks help prevent time theft?

The system ensures employees are paid only for time they actually work. Because it identifies someone by their scanned fingerprints, no one can clock in for anyone else.

# Beyond Features and Functionality: Dedication, Pride, and Years of Experience

We do more than put the most innovative workforce management tools in your hands. We support you at every step with teams of specialized experts dedicated to making your experience remarkable.
