

# Contactless, fast smart card clocking

The Quickest Way To  
Clock In & Out — Anywhere

# Hygienic clocking even in messy worksites

Accurate multi-card card reader protects employee privacy and gathers real-time data in any workplace.

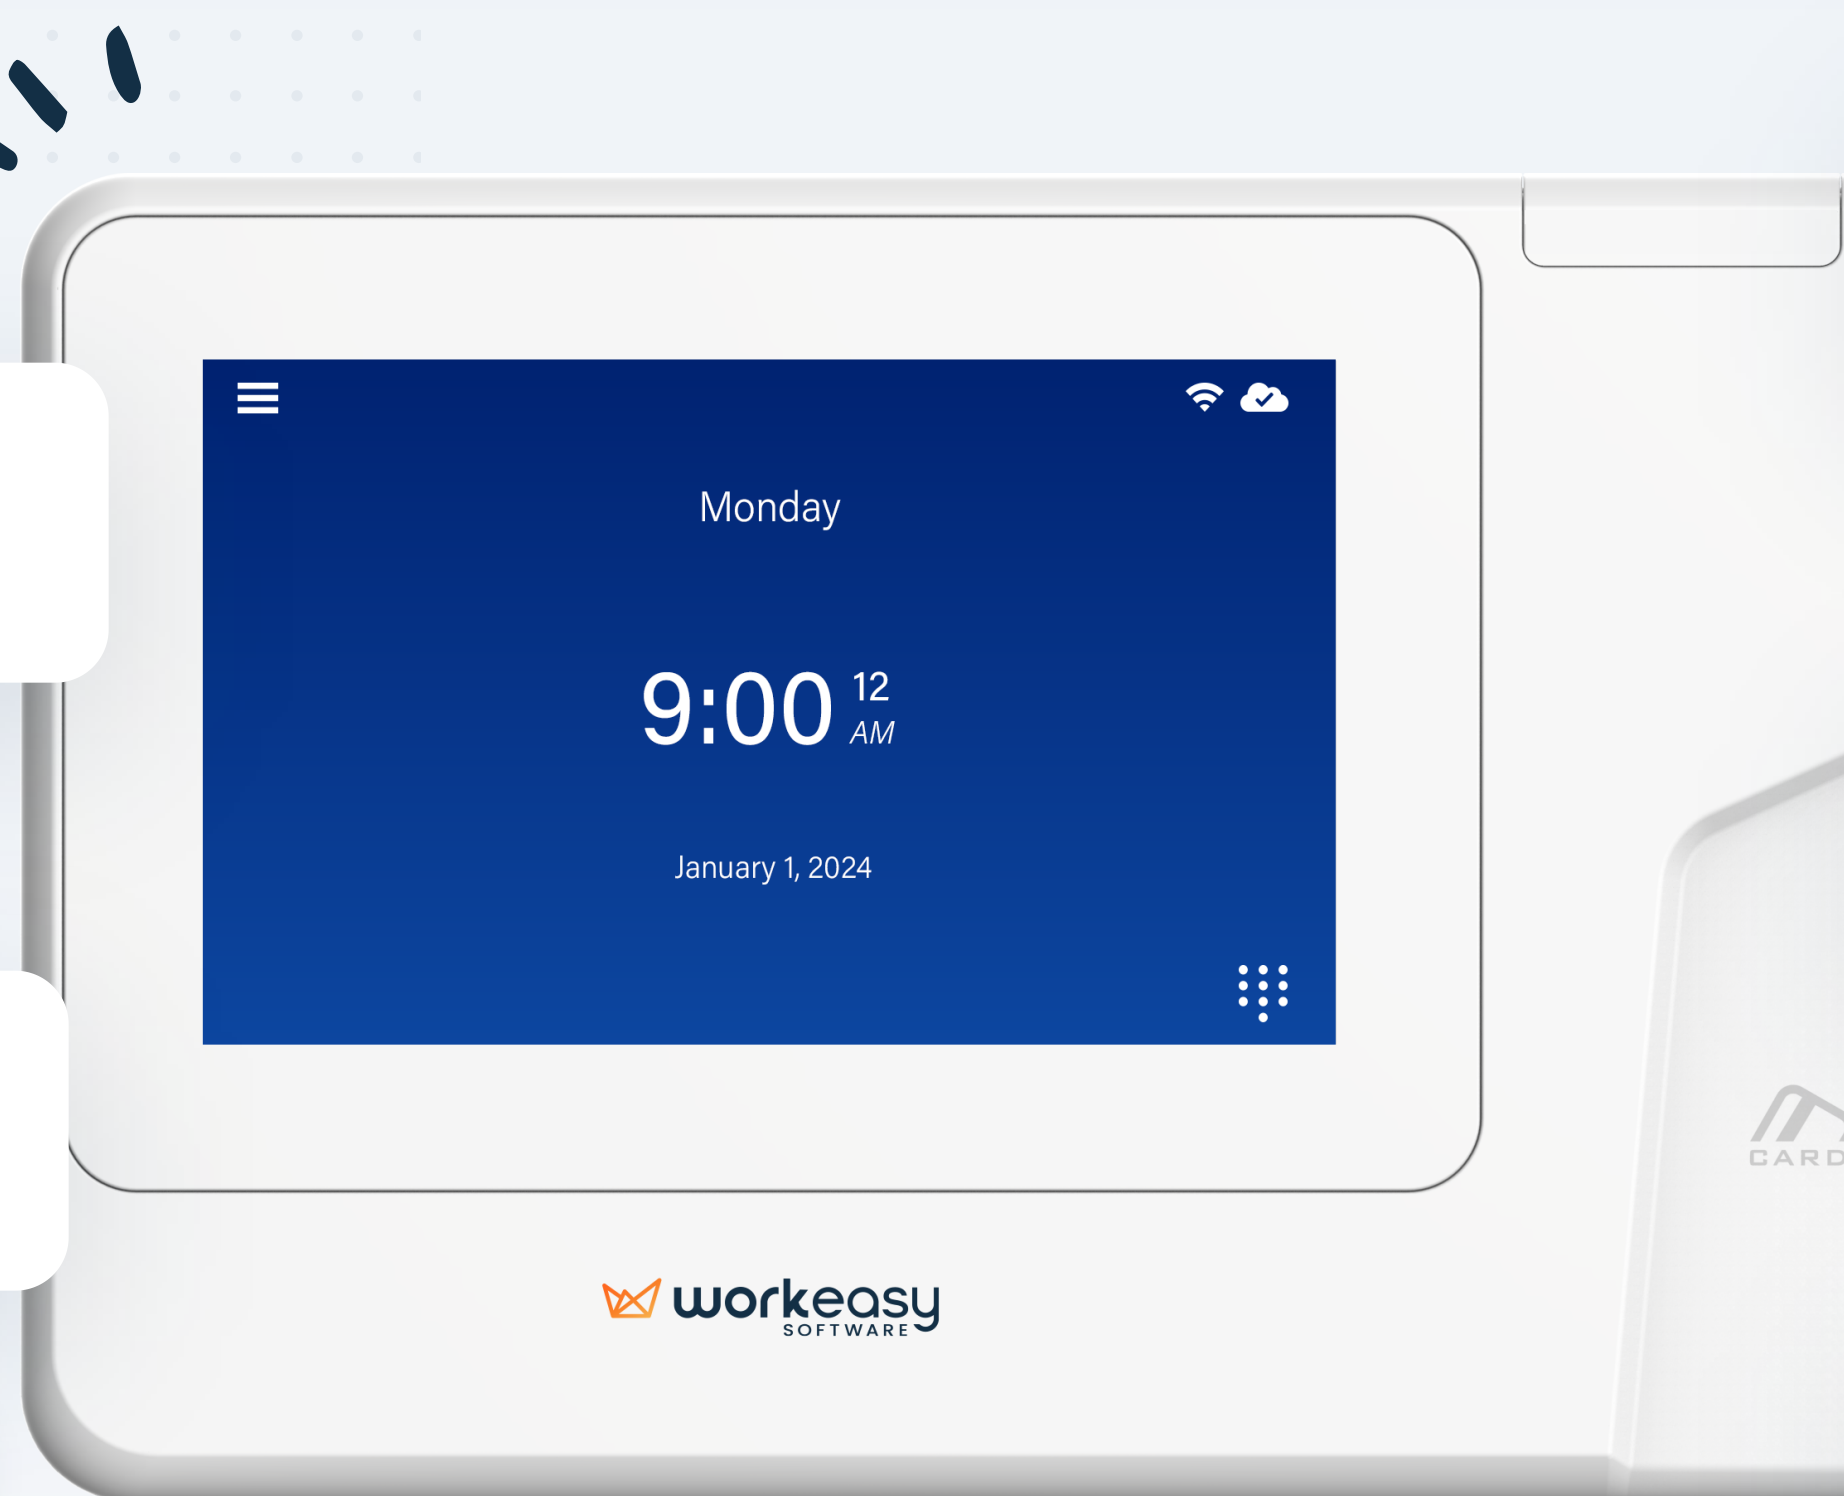

**Fast Performance**  
Perfect for high-traffic workplaces.

**PoE Powered**  
Eliminate multiple wiring;

**WiFi or Ethernet**  
Flexible network settings to stay online!

**Data Encryption**  
Secure biometric data encryption.

**Multi-Card Reader**  
Supports RFID, HID, MIFARE, and more.

## Flexible Subscription

Benefit from the latest technology without the upfront costs.

## Solid Guarantees

Unlimited and limited warranties for subscription and purchase options

## Employee Privacy

Secure data encryption and seamless, real-time data transfer

## Fast Smart Card Scanning – and a Lot More

### Authentication options

You can set different authentication methods for employees to enroll: fingerprint, PIN, or smart card.

### Great employee experience

Employees can review the hours worked in a pay period and previous punches, right from the time clock.

### Valid clocking, consistently

Easily set punch restrictions; prevent clocking outside of scheduled shifts or when overtime is reached.

### Compliance with break rules

Let employees select, waive, or attest to a break directly from the time clock; ensure minimum break times are taken.

### More accurate job costing

Require employees at clock-in to choose a project, client, or job — or set automatic default selections.

### Remote device configuration

Apply settings for all devices or selected ones directly from the software or define employee permissions.

# Multi-smart card reader compatibility

Our smart card time clock reads 125kHz to 13.56MHz cards, including RFID, HID, MIFARE, and more.

**Display**  
5" Touch LCD

**OS & Memory**  
Android  
Up to 10,000 Cards

**Languages**  
English & Spanish

**Cloud Connection**  
Ethernet & WiFi

**Card Reader**  
125 kHz  
HID Prox, iClass SE, MIFARE (Optional)

## Specifications

### Smart Card Reader

Frequencies: 125 kHz  
(13.56 MHz Optional)

### Protection & Certifications

CE, FCC, & ROHS

### Camera & Fill Light

N/A

### Dimensions

Height: 5 inch  
Width: 7.5 inch  
Deep: 1.63 inch

### Power

12V/2A  
PoE + IEEE 802.3at

### OS & Processor

Android  
TI ARM A8 Cortex 1 GHz

### Memory

4GB Flash Memory  
512 RAM

### Display

5" Touch Screen  
Color LCD

### Connectivity

WiFi  
Ethernet  
Universal Relay: 3A

### Bracket

Wall Mount

## FAQs

### What should I consider before using proximity smart card time clocks?

Consider the risks and benefits of the technology, the privacy policy of the vendor, and the laws and regulations in your jurisdiction.

### Can I reuse the smart cards from my existing access control system?

Yes! The Xenio 50 supports card formats including RFID, HID, MIFARE, and more, so you can save money and have a simpler transition to a more efficient time tracking.

### How do proximity smart card time clocks help prevent time theft?

The system ensures employees are paid only for time they actually work. For greater time theft prevention, consider our biometric time clocks.

# Beyond Features and Functionality: Dedication, Pride, and Years of Experience

We do more than put the most innovative workforce management tools in your hands. We support you at every step with teams of specialized experts dedicated to making your experience remarkable.
