

Fingerprint sensor advanced time clock

Ideal For Any Busy,
Indoor Workplace

Multispectral sensor, advanced time clock

Our patented technology makes these clocks ideal for high-volume indoor workplaces — clean or messy.

Flexible Subscription
Benefit from the latest technology without the upfront costs.

Solid Guarantees
Unlimited and limited warranties for subscription and purchase options

Employee Privacy
Secure data encryption and seamless, real-time data transfer

Optimal Fingerprinting – and a Lot More

 **Authentication options**

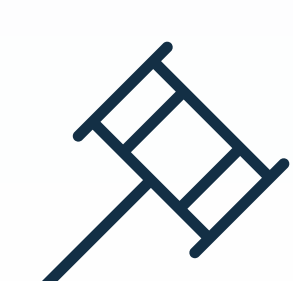

You can set different authentication methods for employees to enroll: fingerprint, PIN, or smart card.

 **Great employee experience**

Employees can review the hours worked in a pay period and previous punches, right from the time clock.

 **Valid clocking, consistently**

Easily set punch restrictions; prevent clocking outside of scheduled shifts or when overtime is reached.

 **Compliance with break rules**

Let employees select, waive, or attest to a break directly from the time clock; ensure minimum break times are taken.

 **More accurate job costing**

Require employees at clock-in to choose a project, client, or job — or set automatic default selections.

 **Remote device configuration**

Apply settings for all devices or selected ones directly from the software or define employee permissions.

Real-world performance and confident security

The sensor performs even with dirty hands.
Advanced technology prevents fake or stolen biometric data.

OS & Memory

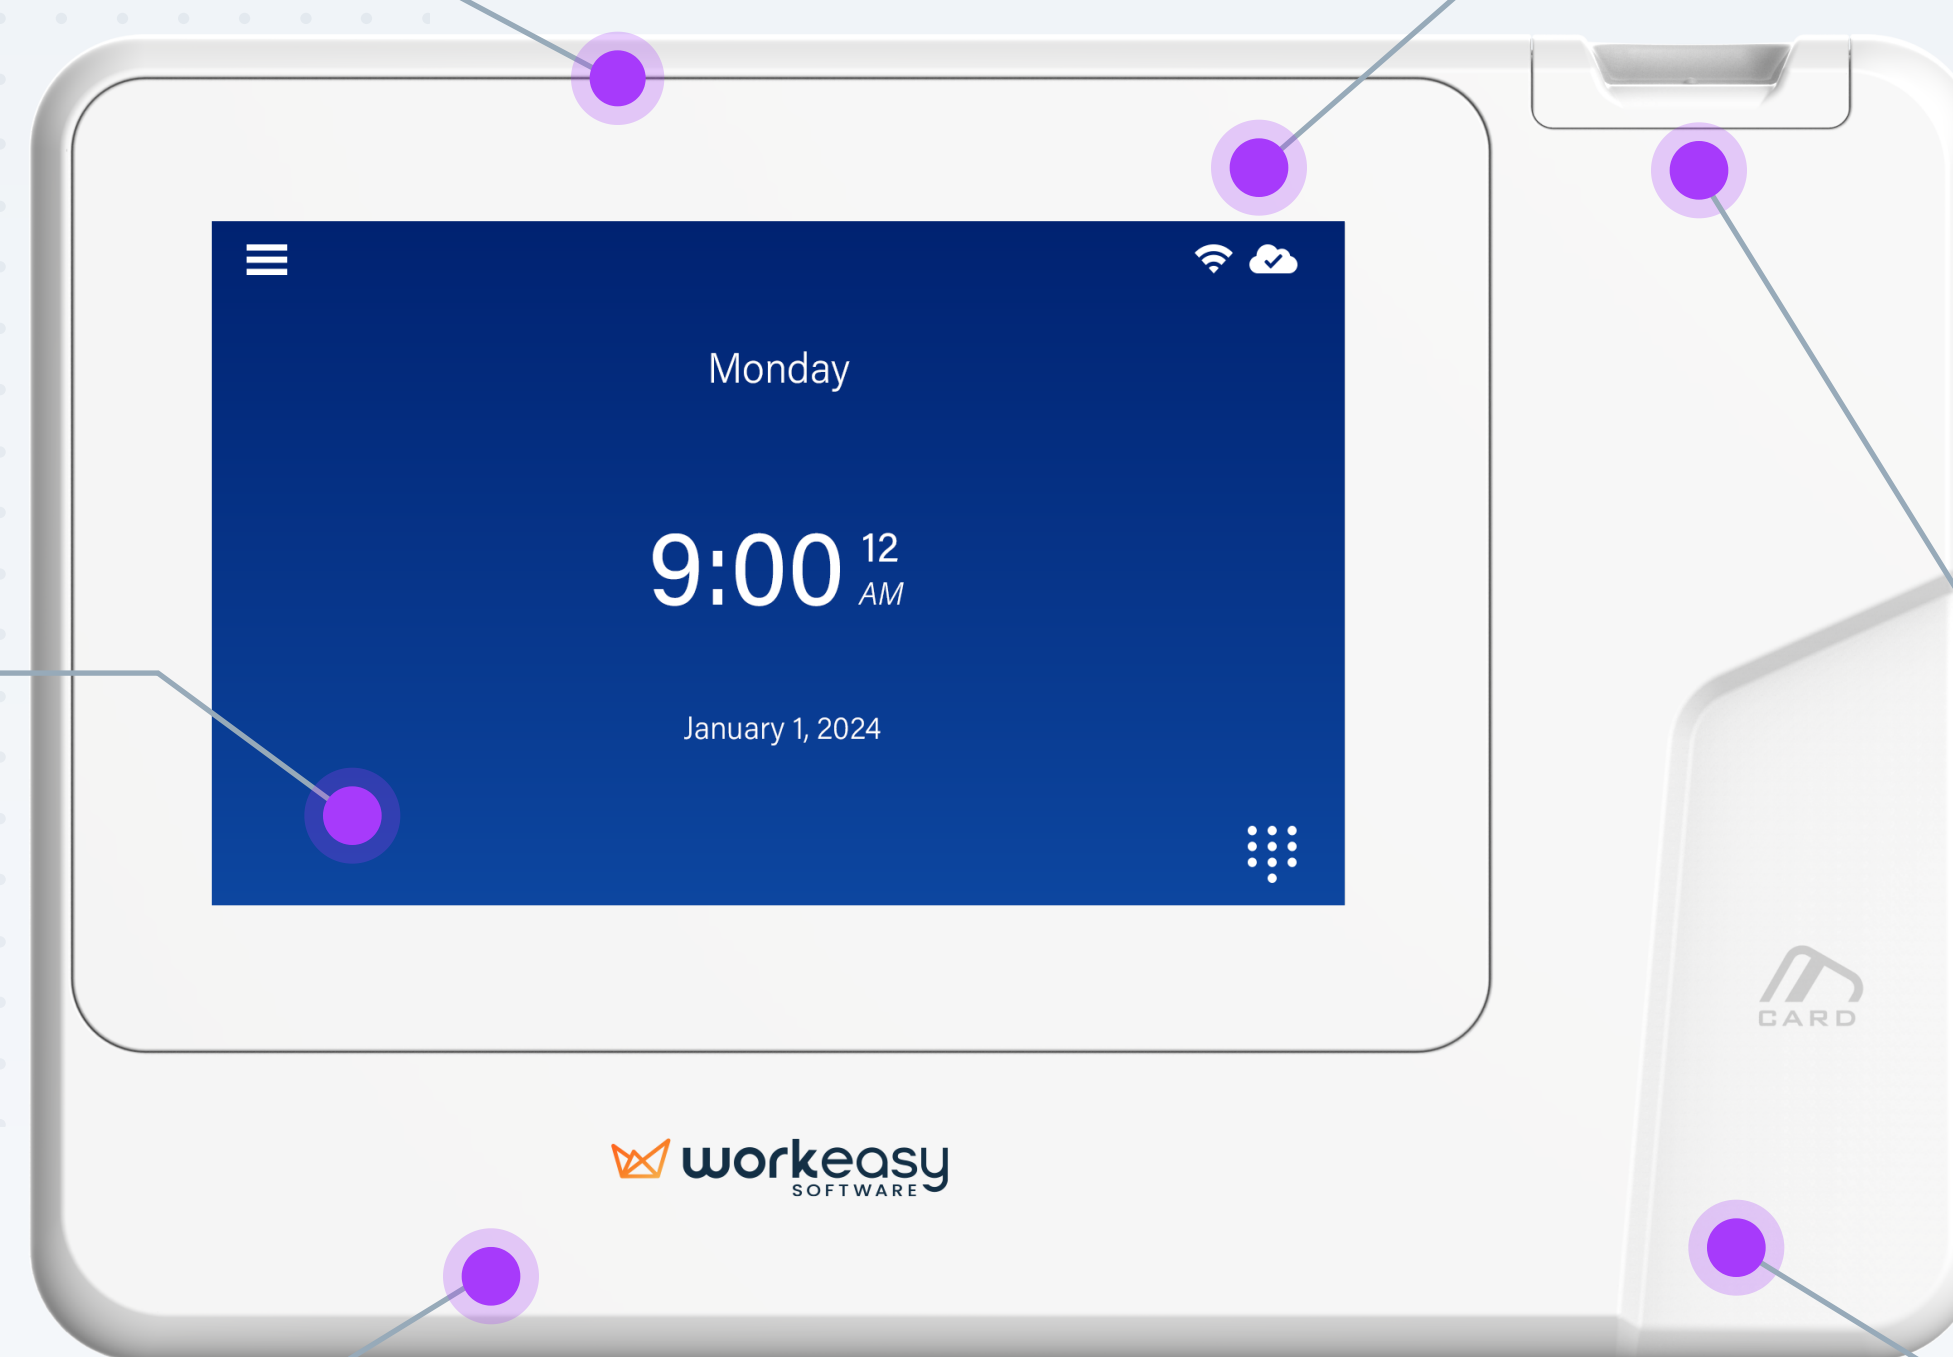

Android
Up to 10,000 Fingerprints

Display

5" Touch LCD

Languages

English & Spanish

Cloud Connection

Ethernet & WiFi

Biometric Scanner

500 DPI
17.4mm x 13.9mm

Card Reader

125 kHz and 13.56 MHz
HID Prox, iClass SE, MIFARE (Optional)

Specifications

Biometric Scanner

Image Resolution: 500 DPI/8-bit
Scanning Area: 17.4mm x 13.9mm
Matching: 1:N up to 10,000 fingerprints

Smart Card Reader

Frequencies: 125 kHz to 13.56 MHz

Protection & Certifications

CE, FCC, & ROHS

Dimensions

Height: 5 inch
Width: 7.5 inch
Deep: 1.63 inch

Power

12V/2A
PoE + IEEE 802.3at

OS & Processor

Android
TI ARM A8 Cortex 1 GHz

Memory

4GB Flash Memory
512 RAM

Display

5" Touch Screen
Color LCD

Connectivity

WiFi
Ethernet
Universal Relay: 3A

Bracket

Wall Mount

FAQs

What should I consider before using any fingerprint time clock?

Consider the risks and benefits of the technology, the privacy policy of the vendor, and the laws and regulations in your jurisdiction.

How does this time clock protect an employee's privacy?

Encrypting image data, limiting access to authorized personnel, regular system-vulnerability audits, and other measures protect the information our biometric time clocks gather.

How do fingerprint scanning time clocks help prevent time theft?

The system ensures employees are paid only for time they actually work. Because it identifies someone by their scanned fingerprints, no one can clock in for anyone else.

Beyond Features and Functionality: Dedication, Pride, and Years of Experience

We do more than put the most innovative workforce management tools in your hands. We support you at every step with teams of specialized experts dedicated to making your experience remarkable.
