

Industrial-grade clocking in and out

The Most Advanced
Fingerprint Scanner. Period.

Multispectral scanner and industrial grade

Reading surface and subsurface information ensures accuracy in any workplace — clean or messy.

Flexible Subscription

Benefit from the latest technology without the upfront costs.

Solid Guarantees

Unlimited and limited warranties for subscription and purchase options

Employee Privacy

Secure data encryption and seamless, real-time data transfer

Accurate Fingerprint Scanning – and a Lot More

Authentication options

You can set different authentication methods for employees to enroll: fingerprint, PIN, or smart card.

Great employee experience

Employees can review the hours worked in a pay period and previous punches, right from the time clock.

Valid clocking, consistently

Easily set punch restrictions; prevent clocking outside of scheduled shifts or when overtime is reached.

Compliance with break rules

Let employees select, waive, or attest to a break directly from the time clock; ensure minimum break times are taken.

More accurate job costing

Require employees at clock-in to choose a project, client, or job — or set automatic default selections.

Remote device configuration

Apply settings for all devices or selected ones directly from the software or define employee permissions.

Undeniable performance and confident security

Accuracy even with dirty hands and wet conditions,
plus FBI-certified encryption algorithms.

Display

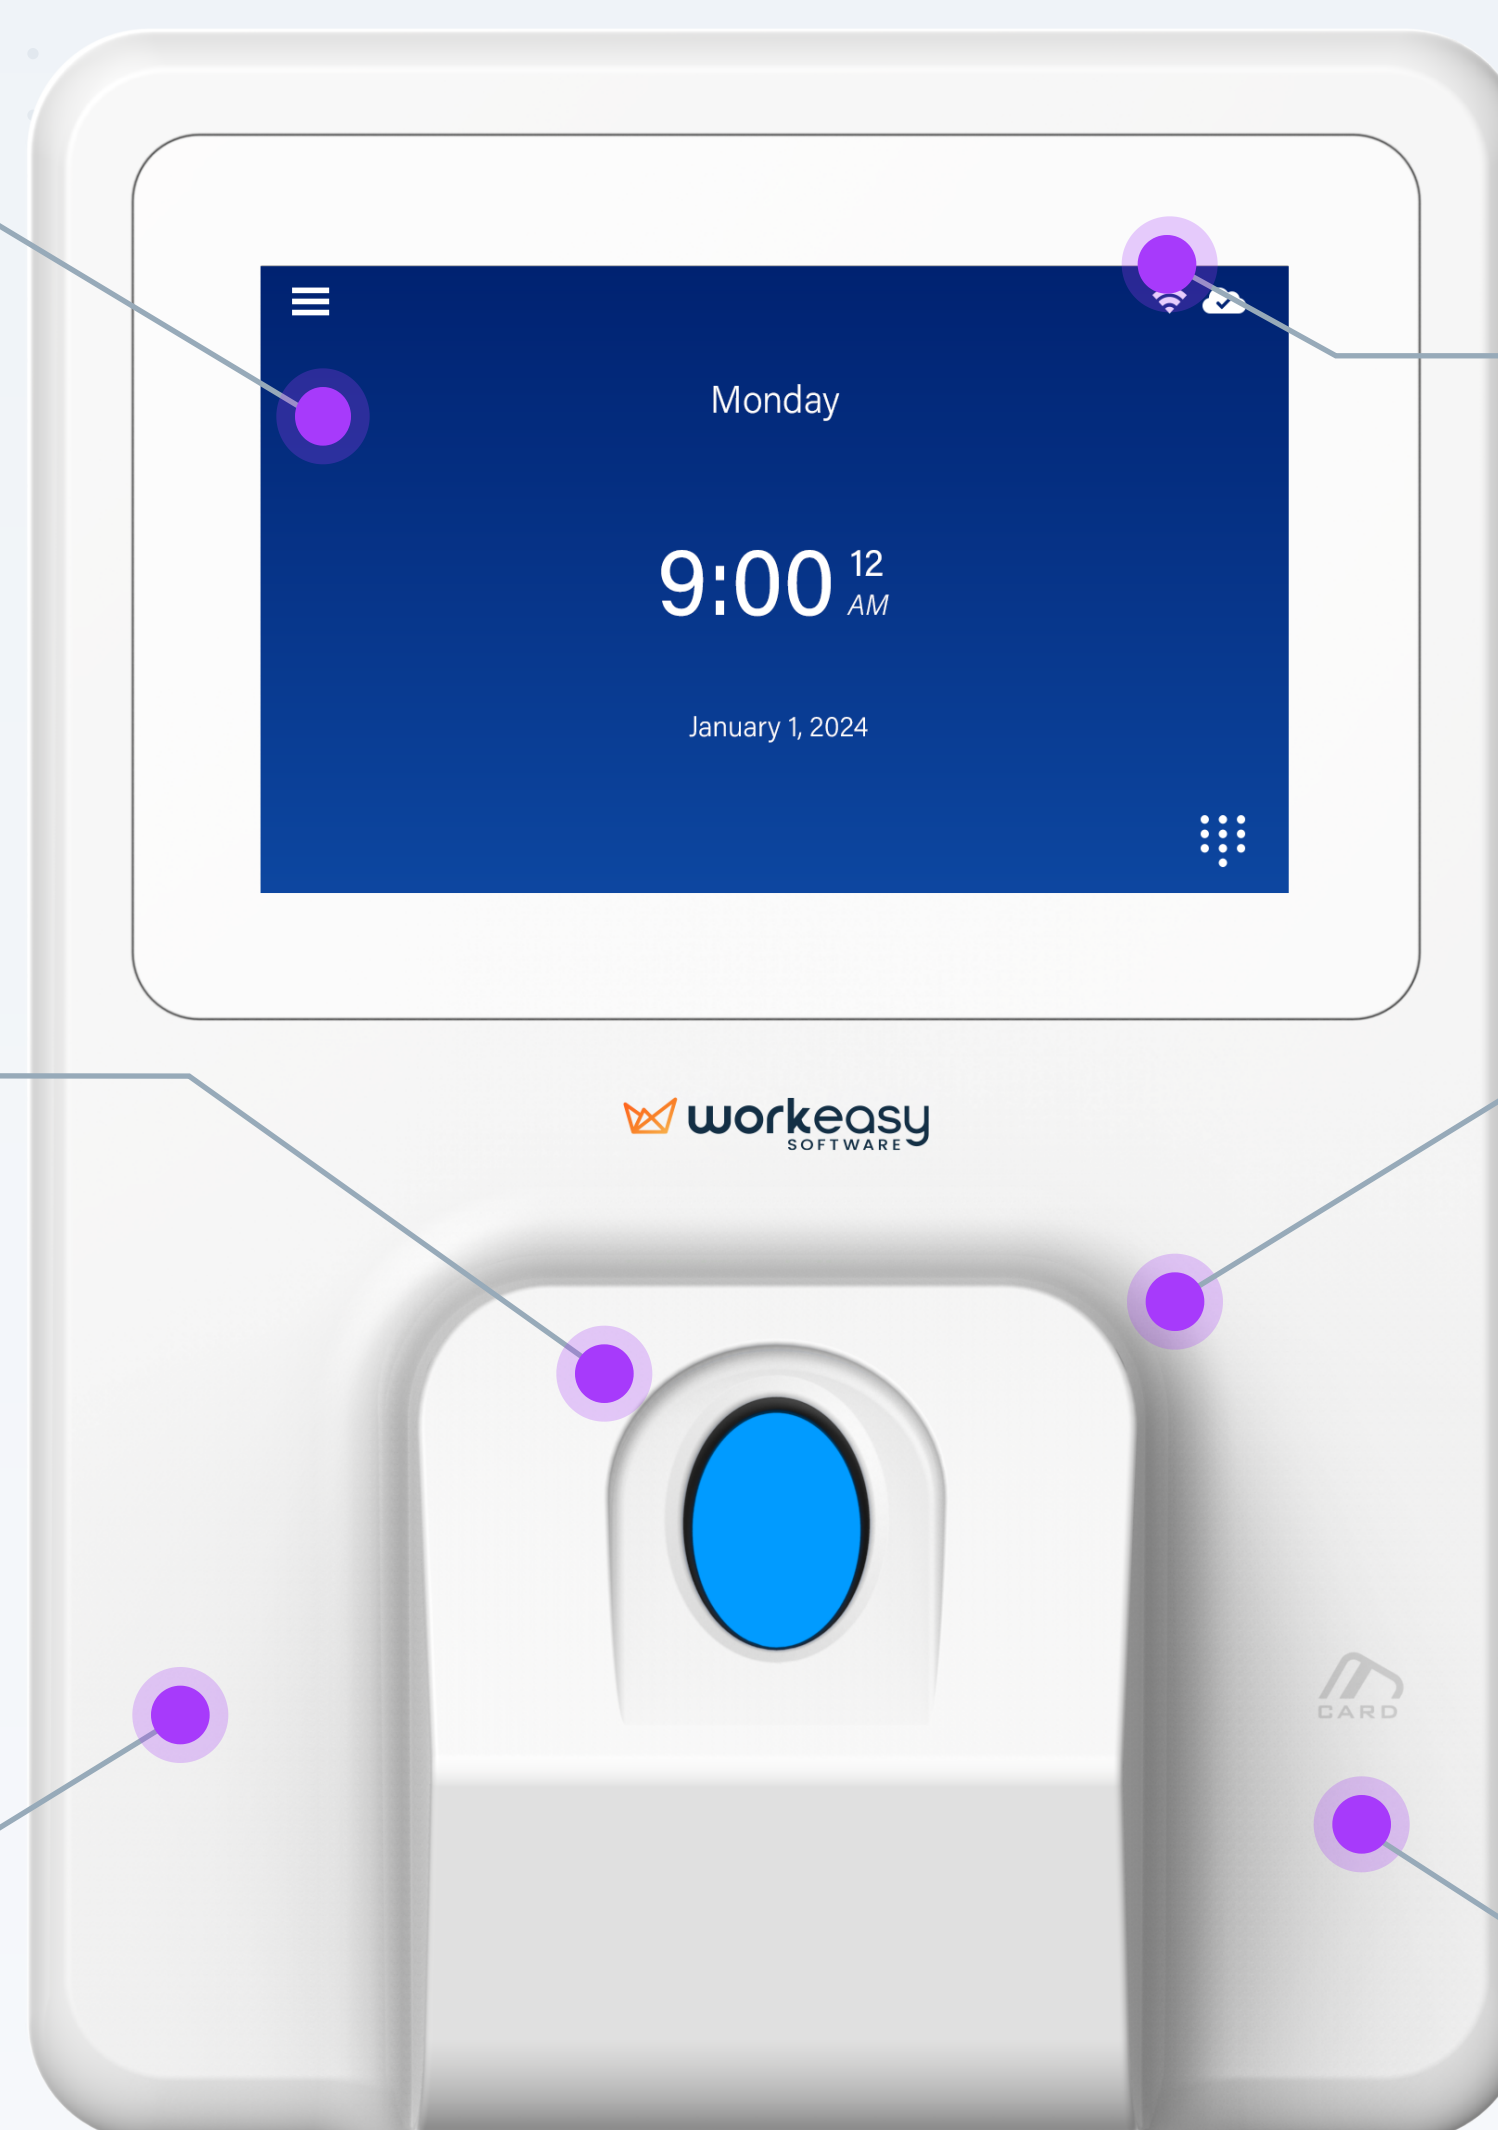

5" Touch LCD
1280 x 800 pixel

Biometric Scanner

500 DPI
18mm x 28mm

Languages

English & Spanish

Cloud Connection

Ethernet & WiFi

OS & Memory

Android
2GB DDR, 16GB eMMC

Card Reader

125kHz RFID
Optional: HID Prox, iClass SE, MIFARE

Specifications

Biometric Scanner

Image Resolution: 500 DPI/8-bit
Scanning Area: 18mm x 28mm
Matching: 1:N up to 10,000 fingerprints

Smart Card Reader

Frequencies: 125 kHz RFID
Optional: HID Prox, iClass SE, MIFARE

Protection & Certifications

CE, FCC, & ROHS

Dimensions

Height: 8.75 inch
Width: 6.25 inch
Deep: 3.00 inch

Power

12V/2A
PoE+ IEEE 802.3at

OS & Processor

Android
TI ARM A8 Cortex 1 GHz

Memory

4GB Flash Memory
512 RAM

Display

5" Touch Screen
Color LCD

Connectivity

WiFi
Ethernet
Universal Relay: 3A

Bracket

Wall Mount

FAQs

What should I consider before using any fingerprint time clock?

Consider the risks and benefits of the technology, the privacy policy of the vendor, and the laws and regulations in your jurisdiction.

How does this time clock protect an employee's privacy?

Encrypting image data, limiting access to authorized personnel, regular system-vulnerability audits, and other measures protect the information our biometric time clocks gather.

How do fingerprint scanning time clocks help prevent time theft?

The system ensures employees are paid only for time they actually work. Because it identifies someone by their scanned fingerprints, no one can clock in for anyone else.

Beyond Features and Functionality: Dedication, Pride, and Years of Experience

We do more than put the most innovative workforce management tools in your hands. We support you at every step with teams of specialized experts dedicated to making your experience remarkable.
