

Facial recognition, ultra-fast time clocks

Advanced And Secure,
Contactless And Accurate

Unfailingly accurate and absolutely secure

The industry's leading facial recognition time clock;
the most advanced vision and image processing

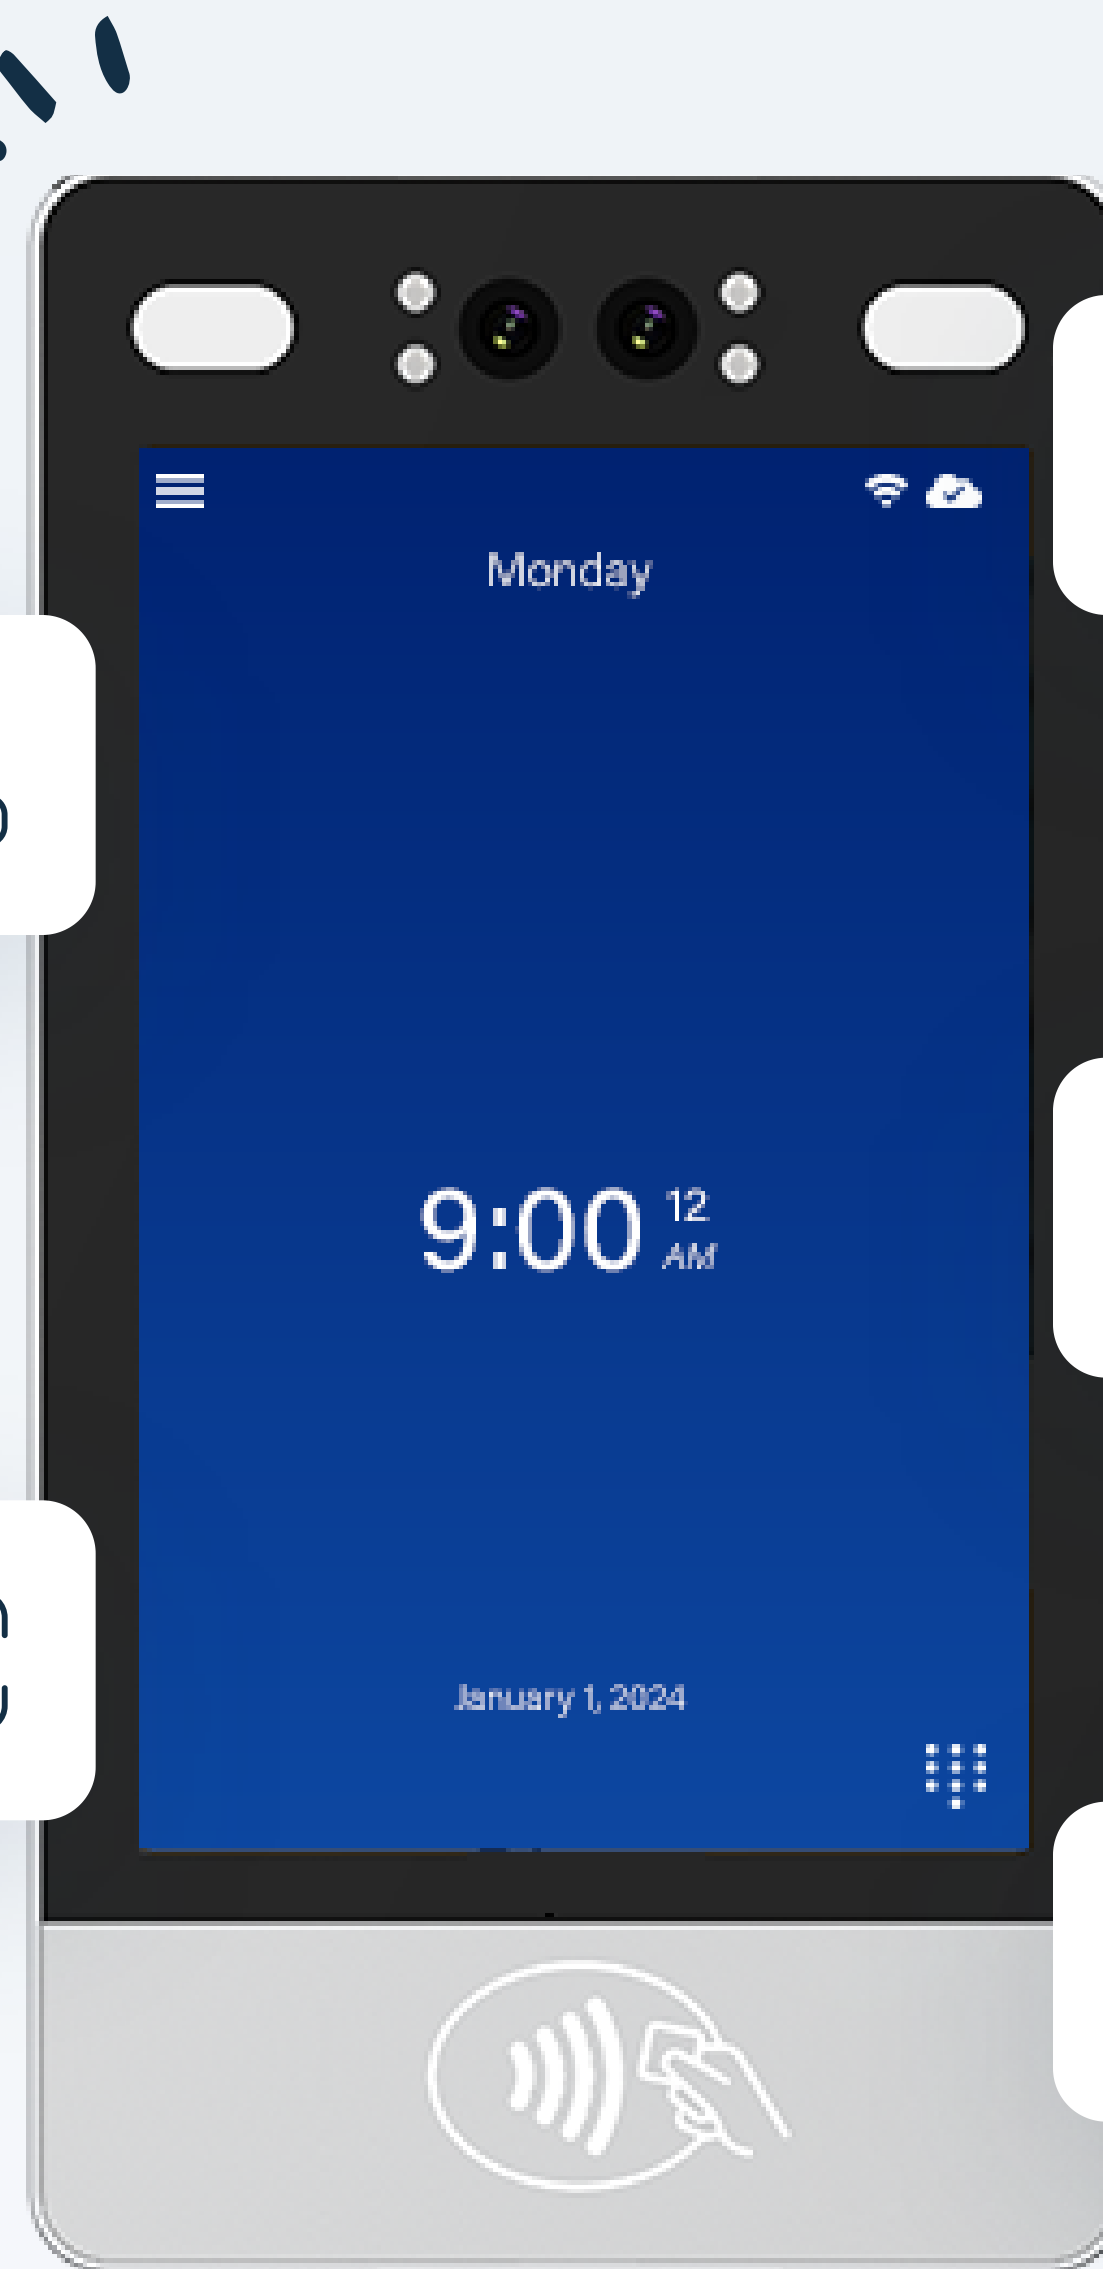

Data Encryption
Secure biometric
data encryption.

Anti- Spoofing
Liveness detection
technology.

Click to
Play Video

WiFi or Ethernet
Flexible network settings
to stay online!

Self Enrollment
Easily enroll employees
with a selfie.

MIFARE Reader
Supports MIFARE
contactless cards.

Flexible Subscription

Latest technology with a
lower, more affordable
upfront investment.

Solid Guarantees

Unlimited and limited
warranties for subscription
and purchase options

Employee Privacy

Secure data encryption
and seamless, real-time
data transfer

Hassle-free Facial Recognition – and More

Smooth, easy self-enrollment

Enrollment is fast and secure with a
selfie, speeding enrollment and
improving employee satisfaction.

Great employee experience

Employees can review the hours
worked in a pay period and previous
punches, right from the time clock.

Valid clocking, consistently

Easily set punch restrictions; prevent
clocking outside of scheduled shifts or
when overtime is reached.

Compliance with break rules

Let employees select, waive, or attest
to a break directly from the time clock;
ensure minimum break times are taken.

More accurate job costing

Require employees at clock-in to choose
a project, client, or job — or set
automatic default selections.

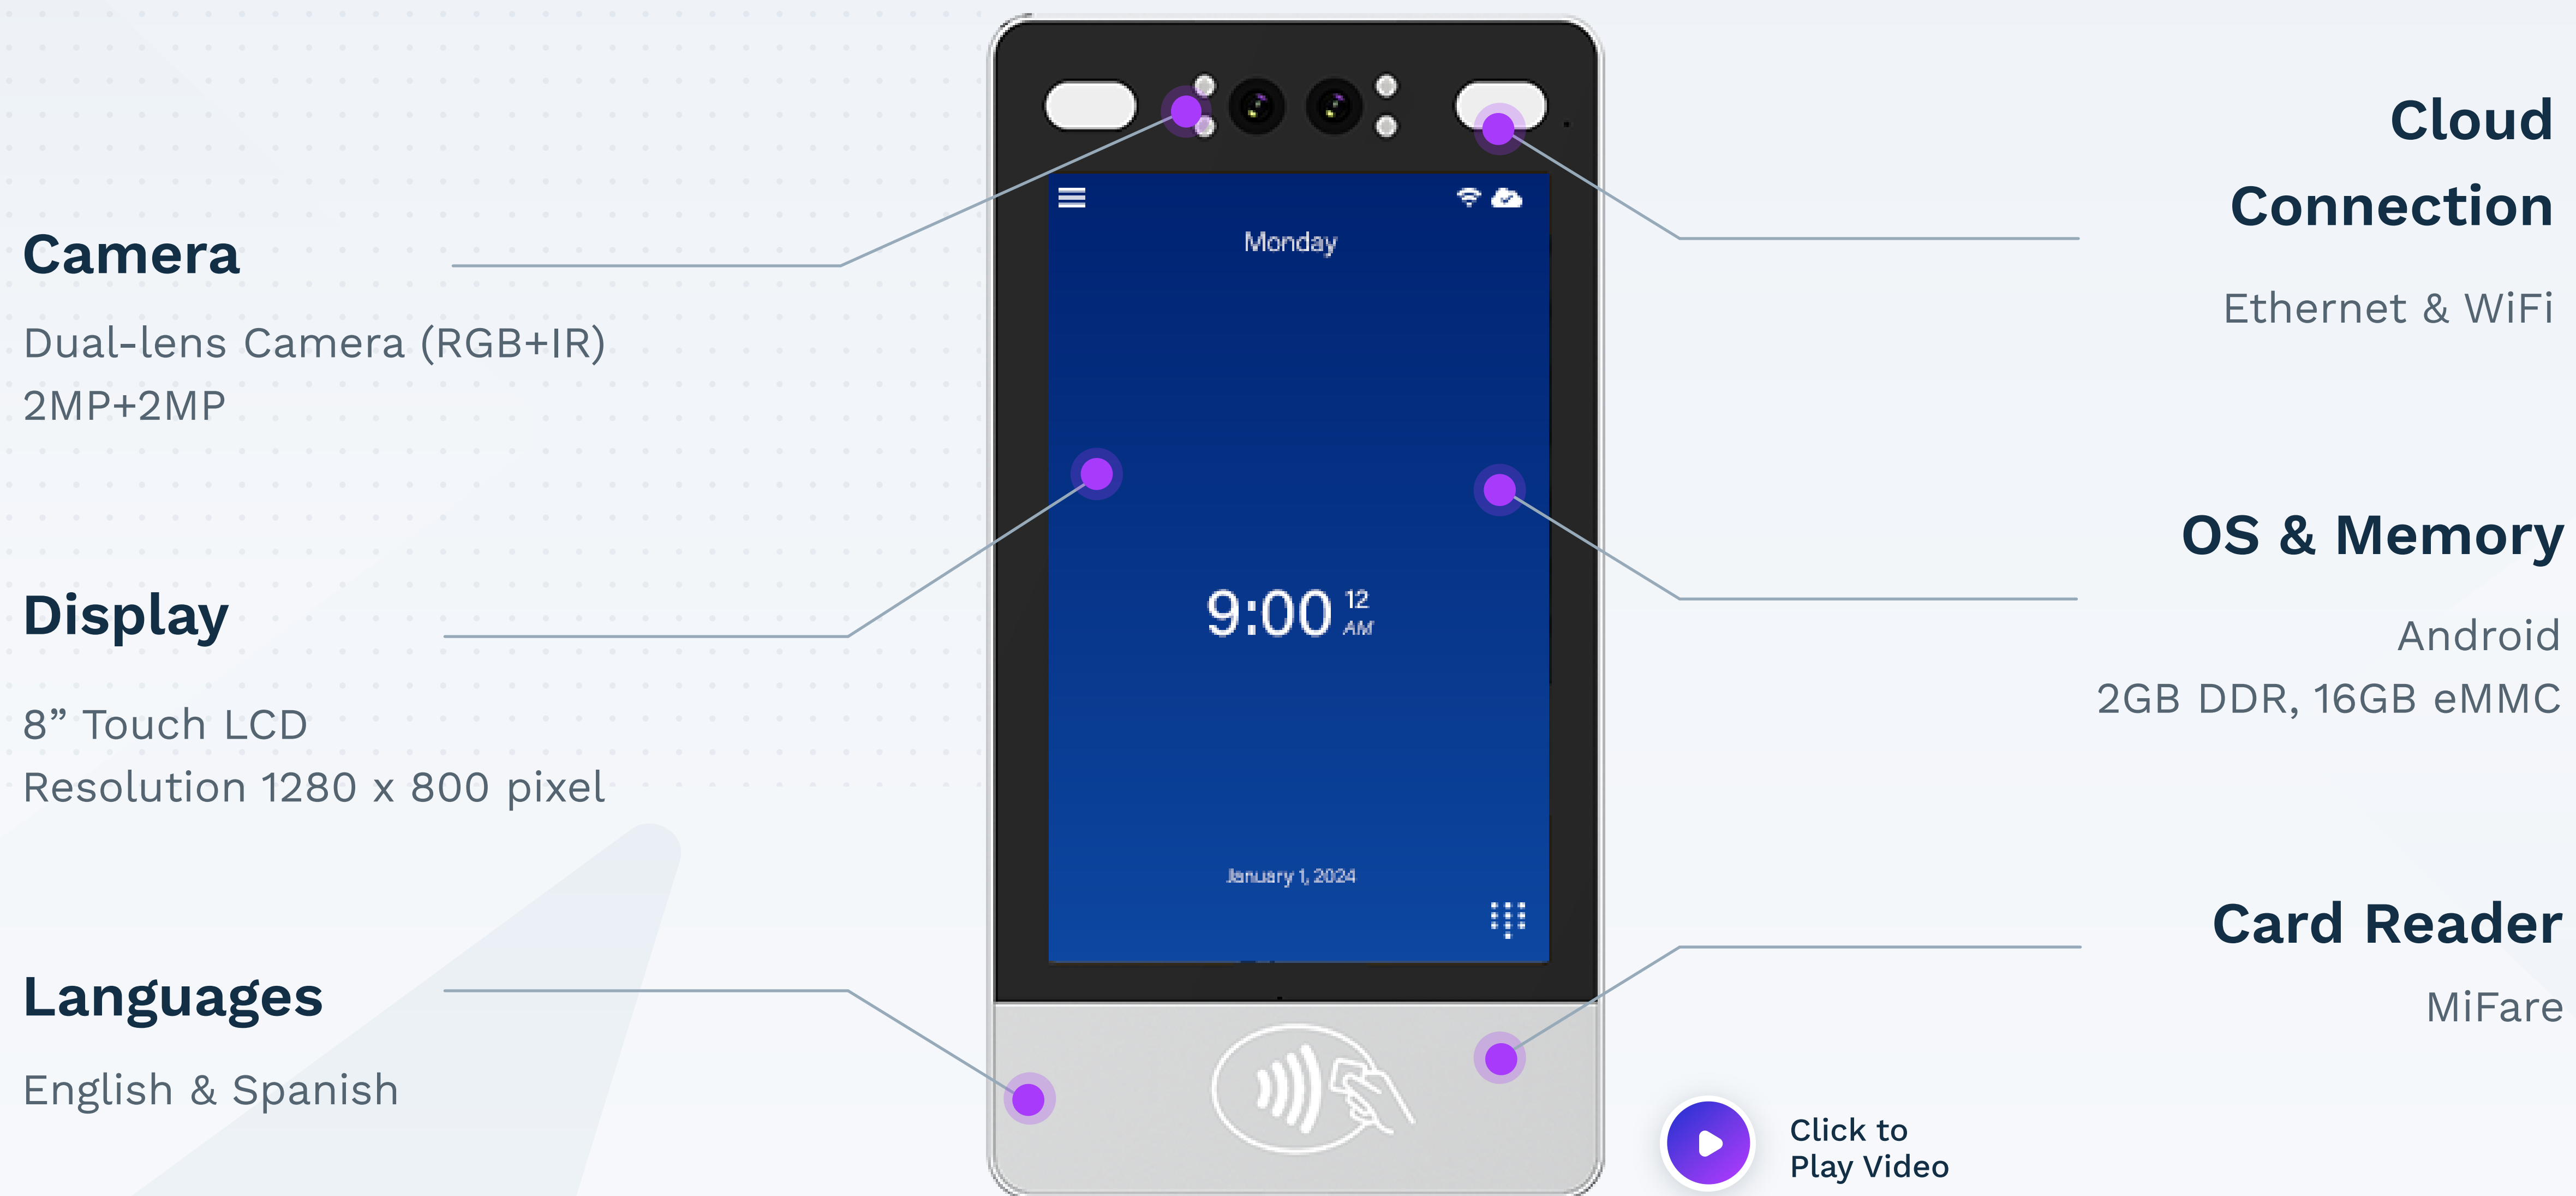

Remote device configuration

Apply settings for all devices or selected
ones directly from the software or define
employee permissions.

No false readings, full data protection

Accurate in any environment, with any demographic;
securely encrypts all information and biometric data

Specifications

Process & Memory

PROCESSOR: Octa Core 1.8 GHz
ARM Cortex
MEMORY: 2GB DDR

Protection & Certifications

IP65
CE, FCC, RoHS, Telec, KC, BIS

Camera & Fill Light

Dual-Lens (RGB+IR) 2MP+2MP
White LED

Dimensions

Height: 249mm | 9.8in
Width: 127mm | 5 in
Depth: 23mm | 0.9 in

Power

12V/2A

OS & Processor

Android
Dual-Core 1.8GHz
+ Quad-Core 1.4Ghz

Memory

2GB DDR
16GB eMMC

Connectivity

WiFi
Ethernet

Display

8" Touch Screen
Color LCD
800 x 1280 pixels

Bracket

Wall Mount

FAQs

What should I consider before using any type of biometric time clock?

For biometric clocks, consider the risks and benefits of the technology, the privacy policy of the vendor, and the laws and regulations in your jurisdiction.

How do your time clocks protect an employee's privacy?

Encrypting image data, limiting access to authorized personnel, regular system-vulnerability audits, and other measures protect the information our biometric time clocks gather.

How does facial recognition clocking help prevent time theft?

The system ensures it's the right employee clocking in and out; it only identifies someone by their face, not by a smartphone image or printed photograph.

Beyond Features and Functionality: Dedication, Pride, and Years of Experience

We do more than put the most innovative workforce management tools in your hands. We support you at every step with teams of specialized experts dedicated to making your experience remarkable.
