

Reliable time clocks, **remarkable pricing**

Affordable, Comprehensive
Time Tracking

The Best of Both Worlds: Industry-leading Clocks and Subscription Pricing

Get cutting-edge devices with no upfront costs and the security of affordable, predictable billing.

Cost Efficiency

Because you pay as you go, financial planning is more flexible.

No-hassle Maintenance

We handle updates, repairs, and support; you can focus on your work.

EasyCare Support

2-hour response; 24-hour repair/replace time; call or click for help.

Accountability & accuracy anywhere

Data Encryption

Every time clock from WorkEasy Software is designed with safe, secure biometric encryption.

WiFi or Ethernet

With flexible network settings, you know your clock will always be online.

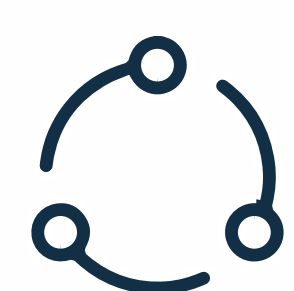

PoE/POE+ Powered

For select clocks, Power over Ethernet or POE+ eliminates the challenges of multiple wiring.

Real-time Visibility

Seamless real-time data transfer between our devices, our software, and third-party systems.

Remote Device Configuration

Remotely configure and apply configurations for all devices or selected clocks, directly from the software.

Offline? No Problem!

Xenio devices collect data during network lapses and transfer all data when a connection is re-established.

Embrace the Future of Hardware Today

Top-tier hardware, predictable costs, total flexibility. Ready for remarkable?

Scalability to evolve with you

Effortlessly adapt to changing business needs by easily scaling your hardware resources up or down.

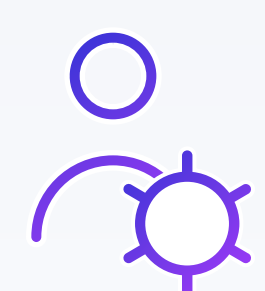

Access to cutting-edge technology

Stay ahead of the curve with access to the latest and best hardware and technology.

Enhanced security and privacy

We prioritize security and compliance, providing you peace of mind for sensitive information.

Benefit from predictable budgeting

Enjoy the confidence and ease of mind with predictable, fixed monthly costs. No more surprise expenses, price fluctuations, or financial uncertainty.

Leverage a competitive advantage

Free up resources to focus on your core activities and gain a clear competitive edge. We'll handle your time-clock infrastructure so you can handle your business.

Rest easy with disaster recovery & data backups

Our HaaS services include robust disaster recovery and data backup solutions, ensuring your critical data is protected and you can keep your business running.

FAQs

Can I get subscription pricing with any WorkEasy Software time clock?

Yes, we offer our subscription pricing model (no upfront costs, predictable monthly payments) for all of our time clocks. Even if you require more than one type of device, you get subscription pricing on each one.

What if I need to add or change time clocks later? How does subscription pricing help with that?

We realize your hardware needs can change as your business grows. Our subscription model offers the flexibility to scale up or down based on your requirements. Easily add or remove time clocks without the complications or expense of buying and selling hardware.

How is an employee's privacy protected?

Such measures as encrypting image data, limiting access to authorized personnel, and regular system-vulnerability audits protect the information our biometric time clocks gather.

Let Us Show You “Remarkable” — Beyond Features and Functionality

As proud as we are of the way our solutions and products make workforce management easy for companies of any size, anywhere, it’s only possible thanks to the dedication, pride, and years of experience we deliver at every step of your journey.
